DRAFT Letter of Support to be sent to Delaware County Council

The undersigned municipality/organization is one of many diverse interests in the Darby Creek watershed. Together we are united by the goal of securing and maintaining the natural and cultural assets in the watershed in order to sustain the quality of life for existing and future generations. Our parks and open spaces, woodlands, and stream corridors help to provide clean air, clean water, and the opportunity to enjoy natural areas, flora and fauna, all of which are essential to the physical, mental, and economic health of our communities. Therefore, [municipality/organization] strongly supports Delaware County's Greenway Initiative as a means to ensure that these watershed resources are restored and maintained.
